

Grooved-end butterfly valve from Bonomi (AHR Expo Preview)

[Bonomi's](#) L700E series of grooved-end butterfly valves are built with an ISO mounting pad and stem for simple automation with electric or pneumatic actuators. Available in sizes 2" to 12", the L700E is designed to meet ANSI/AWWA C606 and MSS SP-67. Maximum working pressure is 200 psi. Standard features include an epoxy-coated ductile-iron body, EDPM-coated ductile-iron disc and a 410 stainless-steel ISO square stem. An ISO 5211 mounting pad is integral, making it easy to add any ISO 5211 standard actuator or manual operator. A BUNA-N coated disc is optional. **AHR Booth #2656**
