

V-ball flanged valves from Bonomi

July 20, 2015

Bonomi introduces its new line of ANSI Class 150 flanged industrial V-port ball valves, which are designed for precise flow control and easy automation. The valves are available with 30°, 60° or 90°

V-shaped ports for superior flow control characteristics. The valves are available from 1/2" to 6" and feature a stainless-steel body and ball.
